CHARLOTTE

35TH

Water Main and Stormwater improvements in Charlotte (SR24/US70), subject to TDOT permit requirements for road construction. (Nightwork only 8PM-5AM, Sun-Thurs)

The project consists of the demolition of the existing water storage tank and the construction of a new 2.5 million gallon water storage tank. Construction also includes approximately 585 linear feet of 24-inch water main (DIP), 384 linear feet of 12-inch water main (DIP), 1 Fire Hydrant, and 679 linear feet of stormwater infrastructure (RCP) varying from 15" to 24" in size within the roadway. Valve vaults, bioretention, fencing, paving, sidewalk, and other miscellaneous site improvements are included in scope of project as well.
