

URBAN FORESTRY REMINDERS FOR FINAL U&O

If Tree Protection is being used, it **MUST** stay in place until Urban Forestry allows the fencing to be removed

All Landscape areas, especially Tree Islands, shall have **ONLY** trees/shrubs. They are **NOT** for Electric Transformers, hotboxes, or Parking Lot lights

Tree calipers and heights will be checked. Shrub heights will be checked

Plant quality will be checked

Insure that water for plants is installed (Irrigation or Hose Bibs at 100')

For buildings 5,000 sq ft or greater, an urban forestry checklist needs to be completed by the designer prior to final inspection. Checklist is available by calling 862-6488 or at Stephan.kivett@nashville.gov
