

In response to the needs of first responders everywhere for heavy duty, purpose-built storage, we are proud to offer a special line of gear and turnout lockers designed with the unique demands of armed forces personnel and emergency response professionals in mind.

Patriot Gear and Turnout (TA 50) Lockers are a mission-specific group of tactical locker products with a load of upgraded accessories. They are designed to serve and designed to last. Patriot Lockers start with heavy gauge, cold rolled steel and are painted using a durable yet attractive powder coat finish. Working from that solid foundation, we've designed premium knocked down and fully welded 24", 30", 36", 42" and 48" wide lockers and a list of accessories that allow the locker to be fitted out for any kind of duty.

Patriot Gear Lockers (TA 50 Locker)

Each Patriot Gear locker is equipped with full height doors and a robust turn handle to lock down important tactical equipment and protect personal items.

Patriot Turnout Lockers

Patriot Turnout lockers come with open fronts for split-second access to flight or emergency equipment that can be as Spartan or heavily accessorized as duty requires.

Patriot Duty Lockers

Patriot Duty Lockers have an extra deep base with a wood bench built-in on top of extra deep drawers. See Patriot Duty Lockers for more information
