

# Green Hills Area Transportation Plan

## Completed August 2011

The Green Hills Area has been the subject of numerous plans and studies over the past 20 years.

The infrastructure of 50 years ago serves a large population and employment base.

## Vision Statement

The Green Hills of 2050 will be a place where people want to live, work, and play. Balancing livability and growth, Green Hills will continue to be a destination for great shopping, a prestigious office location, a residential address featuring a variety of desirable housing choices, and a strong education center. Green Hills will be a community that is people-oriented and provides residents and visitors a range of transportation options to move both through and throughout the area. The Green Hills of tomorrow will contain a variety of open spaces, arts, and civic uses, interconnected with neighborhoods, housing, offices, stores, schools, and restaurants to encourage walking, bicycling, or the use of transit. Much as today, the area will continue to be a regional economic engine that is complementary to downtown Nashville and other activity centers of the region.

### Goal #1

Enhance the livability of the Green Hills community

### Goal #2

Support and expand the economic and environmental sustainability of the Green Hills area and its role as the economic center of the region

### Goal #3

Improve the integration of the Green Hills and Regional Transportation Systems and expand mobility choices in the Green Hills area
