

## Water Quality SCM Maintenance Companies

The following is a list of companies that will maintain post-construction water quality Stormwater Control Measures (SCMs) such as underground detention units and stormwater ponds. Each company has advised NPDES that it will submit inspection forms and maintenance documentation, as applicable, to Metro Water Services upon request and will quantify and properly dispose of the material removed from each of the SCMs maintained.

This list is for your convenience only and is not a recommendation or endorsement by the Metropolitan Government of Nashville and Davidson County of the services these companies provide nor is it an exclusive list of companies that offer SCM maintenance services in Metro Nashville-Davidson County.

### PLEASE NOTE:

OSHA permit-required confined space protocols must be followed during the inspection and/or maintenance (I&M) of certain stormwater quality underground detention units. General safety precautions and appropriate personal protection equipment should be utilized by personnel when accessing such units. Please consult the manufacturer for more information.
