

Metro Nashville and Davidson County

The seal of the Metropolitan Government of Nashville and Davidson County is a large, circular emblem with a sunburst border. It features a central figure of a Native American man in traditional dress, holding a bow and arrow. The text around the seal reads "METROPOLITAN GOVERNMENT OF NASHVILLE AND DAVIDSON COUNTY".

Section Two – Collection System & Diversion Activities

Diversion Activities

Did your local government have any household hazardous waste events? *

- Yes
 No

Disaster Recovery Diversion

Comment on any disaster related solid waste activities that may have influenced diversion efforts with your local government.

None in 2012

Source Reduction Activities

Describe source reduction and reuse activities by public or private entities by jurisdiction.

Backyard Composting - Public Works continues offers two types of backyard compost bins (Earth Machine and the Green Cone) for sale at the Omohundro Convenience Center. In 2012, 125 compost bins were sold. Public Works also donated 8 backyard compost bins to schools this past year. Public Works also offers backyard composting classes and Master Composter classes.

Community Gardens - Public Works supports community gardens and provides compost containers and workshops to church and neighborhood community gardens in Davidson County. We also support the Keep America Beautiful program working to connect community gardens and organizations such as Second Harvest.

List any restrictions the local government or region places on collected wastes (Examples: no cardboard allowed in MSW compactors, additional container charges, etc.)

July 1, 2011 - Yard waste banned from waste containers
July 1, 2012 - Trash cart fees for more than two cart
July 1, 2013 - Private Haulers Offer Recycling and cardboard banned from waste containers
July 1, 2014 - Trash cart fees for more than one cart
July 1, 2015 - Electronic waste banned from waste containers

Section 3 – Solid Waste Planning & Implementation

Publicly Owned/Operated Landfills

Are there any publicly owned landfills in the region?

- Yes
 No

Future Marketing and Educational Initiatives Marketing

Please describe the marketing and educational initiatives you plan in the next year. *

Below is a short summary of 2012 Marketing Initiatives:

- Media campaign with Channel 3 to promote "Recycle and Save"
- Media campaign with Fox to promote Earth Day
- Advertising in Green Hills News, Today magazine and Tennessee Black Pages
- Booths at the Lawn & Garden Show & Nashville Earth Day Festival
- Metro 3 slides run regularly providing information on a variety of waste and recycling events, services and announcements.
- Metro3 video on "Recycle and Save!"
- Regular media releases regarding Public Works services including:
 - E-waste Event in November at LP Field
 - Free Shred Event in November at LP Field
 - Great American Clean-up
 - Christmas tree recycling
 - Brush Collection
- Trash Art Contest with Red River.

Based on availability of funding, Public Works will continue providing the same waste reduction education programs in 2013 as in the past. Please see the next section on Past Education Efforts.

Disaster Debris Management

Does your local government have a Disaster Debris Management Plan? *

- Yes
- No

Is the Plan Modeled after FEMA's PA325 Plan? *

- Yes
- No

Has it been accepted by TEMA and FEMA? *

- Yes
- No

Are pre-event contracts in place? *

- Yes
- No

With whom and for what service: *

DRC Emergency Services, LLC - removal of disaster related debris

Are staging areas identified? *

- Yes
- No

Where? *

Staging areas are dependent on the nature of the debris to be managed. There are three mixed debris staging areas:

1. Donelson/BNA
2. Warner Park
3. Metro Center

How is Waste Reduction and Diversion addressed in the local disaster debris management plan? *

Where possible wood waste and metal items are collected separately for recycling.

Section 4 – Problem Management & Education

Complaints

Is a method provided to receive complaints from the public related to solid waste issues? *

- Yes
 No

Provide the total number of reported solid waste complaints: *

35,785

Provide the number of solid waste complaints resolved: *

35,785

Describe the nature of the complaints: *

Request for additional recycling/trash carts, missed trash/recycling service and general information questions.

Hand made paper recycling program.

Section 5 – Program Summary

Solid Waste Planning - Detail Strategies on Diversion

The Region's 10-Year Plan outlined a strategy to manage solid waste. In lieu of developing a complete update of this Plan as required by TCA 82-211-814, answer the following questions in as much detail as possible. **These questions should be answered by the government body responsible for directly determining solid waste policy within the region.**

Name and title of individual(s) who answers the following questions:

Metro Public Works staff.

Looking back on the Plan from this current year, what changes have been made in the way the county handles & prioritizes Solid Waste?

Beginning July 1, 2012 Public Works began phasing in a pay as you throw program. In July of this past year, residents needing more than 2 trash carts will pay a monthly collection and disposal fee for the 3rd and additional carts. Residents are encouraged to recycling and reduce the number of trash carts they need. Additional recycling carts are provided at no cost. Further changes to this system will be implemented in future years.

List and discuss the three largest obstacles to your solid waste disposal system:

As mentioned in the Region's 10 Year Plan section 4.10, the biggest weakness of the disposal system is "its reliance on a single, privately-owned transfer station and a single contractor to provide transfer, hauling and disposal services to metro and other local governments for the non-recycled MSW generated in the region." An additional obstacle to the regions disposal system is the lack of any commercial compost options.

Probably the most limiting factor, however, is that Metro Public Works only controls a fraction of the waste generated in the county. As noted below, approximately 77% of the waste disposed in Class I landfills and all the waste disposed in Class III-IV landfills falls outside the control of the department. Every effort is made, however, to reach out to private businesses, institutions and residents in the General Services District and satellite cities to promote waste reduction and recycling.

In the coming years, how do you plan to handle disposal of waste differently to better address these issues?

Modification to the current system would be dependent on funding.

List and discuss the three largest obstacles to your waste reduction/recycling system:

Because recycling within the region is done on a voluntary basis, the single largest obstacle is the reduced funding for education and outreach programs. One good example is plastic recycling. When Nashville first started the single-stream recycling program in 2002, plastic was not allowed in recycling carts and the material distributed with the carts, the stickers on the carts all indicated that plastics were not allowed.

Several years later, plastic was added. At that time, staff felt the need for a broad public information campaign to inform residents that plastic could be recycled at the curb (and no longer needed to be taken to recycling drop-off sites). Funding was not available.

Even now, years later, people will periodically request that plastic collection be included. In a recent partnership with Coke, every recycling customer in the Urban Services District received updated information on all items that can be recycled at the curb in a recent "Recycle and Win" mailing which will be part of the 2013 report.

In the coming years, what new programs, or modifications to existing programs, will be enacted to increase the amounts of material being reduced/recycled?

As mentioned above, Public Works is phasing in a pay as you throw program where residential customers will be required to pay for additional trash carts. Recycling carts will be provided at no cost. In 2012, part one of the program began and residential customers with more than 2 trash carts pay a monthly collection and disposal cost for each additional cart. In 2014, residential customers with more than 1 trash cart will pay the additional monthly collection and disposal fee. Recycling carts will be provided at no additional cost.

Improvements Remediation

Facility Improvements - Project any facility improvements needed for processing and/or managing solid waste and diversion efforts:

Public Works does not plan on any facility improvements over the next year.

Monitoring Cost Projections - Project any future monitoring, remediation, or mandated improvements over the next five years by the county for county owned solid waste facilities, including convenience centers or transfer stations:

Landfill monitoring costs for the last fiscal year were:

Bordeaux Landfill - \$52,970.00

Ash Monofill - \$7,152.15

Due West Landfill - \$5,803.03

Lebanon Road Landfill - \$8,731.72

Waste Stream Estimate

Give approximate percentages of each category of waste that make up your county's MSW stream.

Residential: 23%

Commercial: 77%

Successes and Setbacks

Describe any setbacks encountered in your solid waste management program and how these setbacks will be resolved in future plans:

Please see section above on obstacles to the region's solid waste disposal system.

Describe your successes in the implementation of your Solid Waste Management Plan. What are you doing well to promote waste reduction?

The 10 Year Solid Waste Plan outlines short, mid and long-term recommendations to reducing waste in the county. When Metro Council adopted the updated Solid Waste Code in August of 2010, a number of changes to how waste is managed were included. The intent of those changes was to encourage recycling and to provide an incentive for recycling. See description below:

July 1, 2011 - Yard waste banned from waste containers

July 1, 2012 - Trash cart collection and disposal fees for customers with more than 2 carts

July 1, 2013 - All private haulers in the county are required to offer recycling & cardboard banned from waste containers

July 1, 2014 - Trash cart collection and disposal fees for customers with more than one cart

July 1, 2015 - Electronic waste banned from waste containers

Describe how you manage each of the following problem wastes: batteries, paint, electronic scrap, tires, oil and antifreeze. Please include information on any difficulties you have had with each:

All items listed are handled at the Metro Public Works Household Hazardous Waste facility located at the East Convenience Center. All items other than paint are recycled. In addition to the items listed above, residents can drop-off CFL's, pesticides and other household chemicals, A/C units with Freon (staff onsite removes and recycles the Freon) and more. Residents of Nashville and Davidson County have access to this facility seven days per week.

Description of the Municipal Solid Waste Region

State or revise current responsibilities of each local government in the region by jurisdiction.

Each of the local governments (other than the City of Forrest Hills) provides trash and recycling service for their residents. All residents of Nashville and Davidson County have access to trash and curbside recycling collection either through city funded programs or by contracting directly with a private hauler.

Describe and provide an analysis of the Current Solid Waste Management System within the region.

The majority of the waste collected in Nashville and Davidson County is picked up by either city staff, city contractors or private contractors and is transported to one of two waste transfer stations within the county. The waste transfer stations are owned by Waste Management, Inc. and Republic Services. Class I landfilled waste is then transferred out of the region to privately owned landfills.

Describe the growth trends, waste projections, and system structure of the region.

Davidson County is a vibrant region with the population growth rate consistent to Table 5-1 of the 10 Year Plan. Since the current 10 Year Plan was adopted in December of 2008, the Region has seen a general decline in Class I landfilled tons per capita.

Describe current waste reduction strategies for the region. Include effectiveness. If positive waste reduction efforts are not occurring, describe why and lay out strategy with timeline to address negative result efforts.

Currently every resident in the region has access to recycling collection either provided by a city funded service or available to the resident (including apartments) by contracted haulers.

Describe current waste collection and transportation systems. Include any expected changes or revisions to this plan.

Waste is collected by a combination of government services and privately contracted services. As mentioned above, the majority of the waste goes to one of the two privately owned waste transfer stations in the county. No changes to this system are expected in the next year.

Describe current recycling strategies. If capture rate for commodities are less than the percentage described in the region's plan for available materials, what will be done to address this issue. Give time table of projects, responsible parties, and method to determine success that will be used to attain this.

Annual commercial recycling rates can be very volatile depending on private recyclers willingness to provide data. With no state regulations in place to enforce reporting, gathering recycling statistics is challenging. The region, however, is confident that rates, in the public sector, will grow overtime with the implementation of curbside recycling programs in all but one of the satellite cities, the implementation of recycling incentives such as trash cart fees in the Urban Services District, and the upcoming ban on cardboard in waste containers.

Describe the region’s current composting, solid waste processing, waste-to-energy, and incineration capacity and strategies. Note any future or expected changes.

Public Works operates a yard waste processing facility within the county. All yard waste, tree limbs, leaves, etc. received at the facility are ground and aged for use as mulch or other waste diversion activities.

Public Works staff has met with a number of different companies considering composting and/or fuel conversion technologies. Current discussions are under way with the Metro Finance Department to issue an RFP in FY14.

What is the current disposal capacity for the solid waste processing facilities used by the region?

Current projected disposal capacity:

West Camden Landfill – 22.5 years

Bi-County Landfill – 5 years

Middle Point Landfill – 17 years

Describe public information and education strategy, target, and general effectiveness.

For a full description of public information and educational activities including target and general effectiveness see "Solid Waste Planning & Implementation" and "Problem Management & Education."

Describe current problem waste management strategy. Include management descriptions for batteries, oil, paint, antifreeze, electronics and HHW materials.

All items listed are handled at the Metro Public Works Household Hazardous Waste facility located at the East Convenience Center. Residents of Nashville and Davidson County have access to this facility seven days per week.

Briefly describe the current level of staff and how the program is funded.

Funding for waste and recycling come either from the general fund or the solid waste fund. For fiscal year 2013, there are 97 full time employees.
