Operating Policies
 Routine Maintenance (RoM)

Policy No.: RoM-10	Page <u> 1 </u> of <u> 1 </u>
Subject: Inlet Maintenance	Effective Date: 10-1-02
Applies To: All Stormwater Projects	<input type="checkbox"/> New Issue <input checked="" type="checkbox"/> Partial Revision <input type="checkbox"/> Complete Revision
Purpose: To formalize maintenance responsibilities for the cleaning, repair, and replacement of storm sewer inlets and related appurtenants.	
Policy: <ol style="list-style-type: none"> 1. Drainage Systems Along Metro Government ROW MWS will assume responsibility for the maintenance of storm sewer inlets and appurtenants including, but not limited to, pipes, boxes, frames, grates, hoods, and curb backs. Inlet maintenance may consist of cleaning, repair, and/or replacement. 2. Drainage Systems on Private Property MWS will perform inlet maintenance as described in Item 1 above on private property when the drainage system conveys stormwater runoff from a public road right-of-way. MWS will not perform inlet maintenance on private property when the drainage system only conveys stormwater runoff from private properties and/or does not convey stormwater runoff from a public road right-of-way. 3. Drainage Systems Along State ROW At its sole discretion and as needed for proper function of stormwater drainage systems as it affects vehicular safety, MWS may perform inlet maintenance on drainage systems along State roadways (with the exception of the Interstate System)
