### Compost Nashville

Strengths – Detailed information about ownership, maintenance, and taking food waste to a TDEC approved facility. Provided multiple examples of mail outs/handouts, decals for containers, posters, and brochures. Educational material was clear and concise. Clearly explains the educational workshops.

Weaknesses – No dumpster capability. Stated Metro would have to be flexible to changing of cart sizes throughout the contract. Failed to address how containers would be serviced.

### Compost Company

Strengths – Wide range of container sizes are available. Detailed description of how carts would be serviced. Have their own facility. Using EPA’s “Food Recovery Hierarchy.” Gave examples of experience leading community education programs.

Weaknesses – Stated if carts were significantly contaminated they would have to be taken to a landfill. Educational handout was busy and there was only one example provided.

**Redox Environmatics, Inc.**

Strengths – N/A

Weaknesses – Proposal lacked detail. Did not list the TDEC approved facility where food waste collection would be taken. Did not describe how containers would be serviced. Stated “We will develop and follow a well-articulated protocol for handling, removing and disposing of all food and organic waste from designated Metro buildings to ensure elimination of contamination.” No examples of education. No experience listed leading educational training classes.
