*\*Outcome Data will rarely match Intake Data due to the fluidity of the shelter census. Animals are constantly being moved through the "Animal Flow Through" process.*

\*\*\*Not Yet Outcomed refers to animals that are still in the shelter or foster care.

# Metro Animal Care and Control Data Report – Summary

Metro Animal Care and Control uses the National Federation of Humane Societies – Basic Animal Stats Matrix as a tool for data collection.

This basic matrix was designed to serve as a tool for data collection. It is a simple matrix containing what many (including Asilomar, ASPCA, National Federation, American Humane, UC Davis, Maddies Fund, PetSmart Charities and HSUS) have agreed are the minimum data points (along with definitions) an organization should gather. By using the basic matrix - we will have the opportunity to benchmark the work at MACC against similar agencies around the region or the nation.

Additionally, MACC prepares a Trailing 12-Month Report monthly. This reports includes the monthly Euthanasia Percentage. The Euthanasia Percentage is calculated using the recommended standards for an animal shelter.

Euthanasia Percentage Formula –

$$\frac{L - (J+K)}{A}$$

A
