* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.

* The four categories of marital status displayed on the table differ from the options given on the survey. Respondents who indicated that they were married or a member of an unmarried couple have been combined in the married column. Those who reported being either divorced or separated, have been combined in the column noted as Div/Sep. Those who reported never having been married are listed as single.

** The categories of employment status displayed on the table differ from the options given on the survey. Respondents who reported being employed for wages or self-employed have been combined and noted simply as employed. Anyone reporting that they were out of work at the time of the survey are listed as not employed regardless of the amount of time they have not had work.
