

Shelby Bottoms Greenway Pedestrian Bridge #5 Update

Due to erosion of river banks sustained from flooding, Shelby Bottoms Greenway Pedestrian Bridge #5 has been relocated farther away from the Cumberland River.

PLEASE NOTE

The bridge is now open at the new location with temporary gravel approach ramps.

Construction of the new paved connector trail will begin the week of April 20th, 2020.

During the first phase of construction, the unpaved Raccoon Den Trail and Native Grounds Trail will be closed. Users may still access the Shelby Bottoms Greenway and Pedestrian Bridge #5 using the greenway through-route.
