SCENARIOS

Scenario 1: Five Through Lanes with Improved Access Management

Pros:
1. Consistent with redevelopment already occurring
2. Continuous center turn lane

Cons:

Scenario 2: Protected Bicycle Lanes

Pros:
1. Increased comfort for people bicycling
2. Continuous center turn lane

Cons:
1. Reduced sidewalk width for people walking
2. No median for people crossing
3. Driveways create conflicts for people bicycling

Scenario 3: Dedicated Bus/Right Turn Lanes

Pros:
1. Improves frequency of buses
2. Dedicated space for right turns
3. Maintains through lanes for peak hour traffic
4. Improved traffic signalization

Cons:
1. Removal of continuous center turn lane
2. No median for people crossing

Scenario 4: Pedestrian Crossing Islands

Pros:
1. Median for people crossing
2. Opportunity for additional street trees
3. Left turn lanes at intersections
4. Narrowed visual field provides speed reduction
5. More comfortable walking environment and café seating

Cons:
1. Increased amount of U-turns at left turn areas
2. Additional maintenance needs for plantings
