Background: In 2000, The Tennessee General Assembly created a pilot program in which 44 Tennessee law enforcement agencies volunteered to collect detailed information for vehicle stops, including race, ethnicity, and gender of driver. In 2001, the Metropolitan Nashville Police Department (MNPd) began collecting this information for vehicle stops initiated in Metro Nashville. Although the State of Tennessee has since discontinued the program and does not require law enforcement agencies to collect the additional information, MNPd has elected to continue the practice.

The data collection instrument is MNPd Form 252 – Vehicle Stops Data Form. All Metropolitan Nashville Police Department officers are required to complete MNPd Form 252 – Vehicle Stops Data Form whenever a vehicle is stopped. Each record denotes if a citation is issued, an arrest is made, a search is conducted, physical evidence is seized, etc. Demographic information of the driver is also collected. The officer initiating the stop must use personal observation to determine gender, race, and ethnicity of the driver.

Metro Council Ordinance BL2016-483 (enacted 4/4/2017) amends section 2.44.115 of the Metropolitan Code of Laws to require the Metropolitan Police Department to provide traffic stop reports to the Metropolitan Council. Although detailed reports had been provided since 2008, the language of ordinance BL2016-483 defined requirements for reports published after 2017:

Annual traffic stop report. On or before March 30 of each year, the police department shall submit an annual traffic stop report to the metropolitan council, which report shall include, but not be limited to:

1. For each “demographic category” as defined in subsection (2) below, a listing by MNPd Precinct and MNPd patrol zone of the following:

- a. The total number of traffic stops;*
- b. The percentage of traffic stops that result in warrantless probable cause searches;*
- c. The success rate of warrantless probable cause searches, defined as the percentage of such searches that result in the seizure of incriminating evidence of any kind;*
- d. The percentage of traffic stops that result in warrantless consent searches without probable cause;*
- e. The success rate of warrantless consent searches without probable cause, defined as the percentage of such searches that result in the seizure of incriminating evidence of any kind;*
- f. The percentage of traffic stops that result in warrantless “pat down” searches;*
- g. The success rate of “pat down” searches, defined as the percentage of such searches that result in the seizure of illegal weapons.*

2. Each “demographic category” shall be defined by sex, race, and ethnicity. For instance, “White non-Hispanic males,” “Black females,” “Hispanic white females,” etc.

Analysis is based on data collected from MNPd Form 252. “Physical evidence seized” is determined from yes / no entries on Form 252 for three categories: weapons, drugs, other. Information is summarized at three different levels of geography: county, precinct, and zone. In some cases, precinct and zone are undetermined because the stop location address was not validated by the officer conducting the stop. These stops are categorized as "Precinct Undetermined" / "Zone Undetermined."

Information contained in this report sourced from MNPd RMS, Motor Vehicle Data Stop database on: 1/11/2019. This report is intended to be a management and planning tool and does not reflect the official vehicle stop counts for the department.
