

METRO WATER SERVICES
RESIDENTIAL CUSTOMERS SPRINKLER POLICY
CSC 2007-1

Basis for policy:

1. Metro Council approved BL2007-1186 providing for residential customers to receive a sprinkler adjustment and the Department was to implement a method for computing or estimating the amount of water diverted from the public sanitary sewerage system.
2. The legislation specified that the estimate be based on the customer's monthly usage during the months of January, February and March.

POLICY:

1. Sewerage service charges for all residential bills between April 1 and November 30 will be billed at maximum of 130% of the winter quarter average.
2. The customer's winter quarter average is based on the average consumption (usage) for the months of January, February and March.
3. Customer accounts that did not bill during January, February and March will be calculated using an average based on the number of occupant's times 300 cubic feet (3ccf). If the number of occupants is not available, a default average of 800 cubic feet (8ccf) will be used.

Effective Date: June²⁷, 2007
