Updated version of CSC20001

Water Diverted From Public Sewerage System Measurement
Reduction in Charges for Commercial/Industrial Customers
Section 15.44.050 of the Governing Ordinance

Basis of consideration:

Commercial customers may install a separate meter to measure water that is not returning to the sewer.

Policy:

For any commercial/industrial customer to be considered for a reduction in sewerage service charges because of water excluded from the public sanitary sewerage system they must, at their expense, install a separate meter to measure the actual quantity of water used for irrigation or otherwise excluded from the public sanitary sewerage system. The meter must be approved by the MWS Permits section, meet MWS specifications, and will be required to be read via our electronic equipment. This meter shall be billed water charges only.

Effective Date: 11/17/2014

RECOMMENDED:
