

**THE RIGHT PRESCRIPTION
FOR SAFE WATER.**

Do you know what to do with expired and unused medications?

Do NOT flush unused medications down a toilet or sink!

Remove the unused medication from its original container and place it in a sealable plastic bag such as a baggie or sandwich bag, mix with an undesirable substance such as used coffee grounds or kitty litter, and place the bag in your normal household trash.

Dispose of the trash as you would other household garbage.

This will insure the medication is disposed of safely in an environmentally engineered and protective landfill.
