

Metro Water Services
National Food Safety Modernization Act database

Metro Water Services (MWS) is committed to providing a safe and dependable source of high quality drinking water to the community. The water provided by MWS consistently meets or exceeds all of the United States Environmental Protection Agency's (EPA) health standards and all state and federal requirements for drinking water.

For more information regarding water provided by Metro Water Services, please review the complete water quality report and consumer confidence report which can be found on the following website:

<http://ccr.nashville.gov>

While MWS cannot guarantee that there will be no disruption of services, we understand the necessity of consistent and uninterrupted service for facilities/plants providing food processing services and therefore maintain a National Food Safety Modernization Act database. This database is used to contact businesses of unplanned service interruptions which could compromise food safety. We recommend that you apply for your facility/plant to be added to this database if you have not already done so.

To apply, please contact our Customer Service Center at (615) 862-4600 or send this form to:

Metro Water Services
National Food Safety Modernization Act
1700 3rd Ave N
Nashville, TN 37208
With the following information:
