

Keep Our Streams Clean!

Trash on storm drains and roads end up in our streams.

When it rains, trash is carried through the storm sewers to nearby creeks.

Trash can clog storm drains, cause flooding, and is harmful to wildlife.

Ways you can help

- Never litter!
- Dispose of all trash into proper receptacles.
- Secure trash bags and lids on bins and cans.
- Recycle!
- Set an example for others.
- If you see litter, pick it up.

Together, we can keep our neighborhoods and streams clean!
