

## Municipal Solid Waste Planning Region

### ANNUAL PROGRESS REPORT

January 1, through December 31, 2004

This annual progress report covers the Region's solid waste activities from January 1, 2003 through December 31, 2003 and is due (original and one copy) in the Division of Community Assistance (DCA) office **on or before March 31, 2004**.

The progress report is considered to be an opportunity to reflect on successful implementation of the Region's ten-year plan (or five-year revision to plan). It is understood that the strategies originally planned for attaining the Region's goals may have changed because of unforeseen circumstances. Changes should be reflected in this report.

Should the Region have difficulty collecting information necessary to prepare this report, the statute allows the Region to compel those actively engaged in the collection, transportation, and/or disposal of solid waste to provide the necessary information [T.C.A. §68-211-871(c) and (d)].

Contact DCA for additional information or assistance at (615) 532-0445.

**SECTION II. MUNICIPAL SOLID WASTE REGIONAL PLANNING BOARD MEMBERS**

*T.C.A. 68-211-813 (b) states that each Region must have a board that shall consist of an odd number of members, not less than five nor more than fifteen. Each county that is a member of the Region must be represented by at least one member. Municipalities that provide solid waste services either directly or by contract shall be represented on the board. Municipalities entitled to representation may agree to be represented jointly by a board member.*

*The members of the board shall serve for terms of six (6) years or until their successors are elected and are qualified by taking an oath of office, except that the initial board shall have approximately one-third (1/3) of the members with terms of two (2) years, and approximately one-third (1/3) of the members with terms of four (4) years, so as to stagger the terms of office.*

*Appointments made after July 1, 1994, to the board for a municipal solid waste region consisting of counties having a population less than two hundred thousand (200,000) according to the 1990 federal census or any subsequent federal census shall be made so that rural landowners shall have representation on the board, and by December 31, 1998, at least thirty percent (30%) of the membership shall consist of members who own at least a fifty percent (50%) equitable or fee simple interest in land that is eligible for classification as agricultural, forest or open space land under the terms of the Agricultural, Forest and Open Space Land Act of 1976, as amended.*

**SECTION III CHAPTER BY CHAPTER UPDATE OF  
MUNICIPAL SOLID WASTE REGIONAL PLAN**

**CHAPTER 4. Recycling**

*The Solid Waste Management Act requires that the Region annually report the amount and type of recyclable materials collected within that Region. To assure state and regional coordination in the Region's recycling program, a recycling contact must be designated.*

**CHAPTER 4. A. List Contact Responsible for Recycling Reports**

**C. Did the Region's Recycling goals and/or plans change in 2004?**

Details

--

#### **D. Tennessee Recycling Report for 2004**

*Effective January 1, 1996, each county must provide, directly or by contract, one or more sites for the collection of recyclable materials, unless an adequate site is otherwise available [T.C.A. § 68-211-863]. If the Region contracts with a private recycling firm to fulfill the requirements, include a letter from that firm to the County Executive indicating a willingness to provide this service. The letter should state that the facility is available to all county citizens and should also include a list of the materials which will be accepted.*

*The Region shall provide copies of the Tennessee Recycling Report to each collection facility for completion. Each commercial and industrial in-house recycling program shall complete the Tennessee Recycling Report for 2003. Each County, Municipality and Non-Profit shall complete **one** report to include information for all programs under their control. (i.e. city or county schools, convenience center collection sites, etc.)*

**B. Determining the Number of Convenience Centers**

To determine the number of convenience centers that would be required for a county to operate under Tennessee Regulations 1200-1-7-.10, the service area of a county must first be calculated. The service area can be calculated using square miles or population. Area Method for determining the service area can be found in Appendix D or Page 7 in the Annual Progress Report Guidelines.

**Method Used**

Population

Area

C. Indicate the total number of convenience centers required by either the population or square miles method for each county in the Region in the table

COUNTY:	Davidson	Number of CCCs REQUIRED		Number of CCCs listed	3
---------	----------	-------------------------	--	-----------------------	---

D.  CCC NUMBER Required Is LARGER THAN the Number of Listed CCC.

If YES for any county in the Region, how is collection assurance

Note: This does not include municipal corporations operating mandatory collection services.

**CHAPTER 6. WASTE COLLECTION AND TRANSPORTATION CONT'D**

*E. Higher Level of Service - Alternative Systems*

Chapter 1200-1-7-.10(2)(c) states that "If a county or region proposes an alternative system said system shall be approved by the Commissioner. The proposed system must provide a higher level of service than convenience centers. The county must, at a minimum, provide a review and state in detail the criteria by which the system provides a higher level of service."

## CHAPTER 13 FLOW CONTROL

*TCA 68-211-814(b) (1) (A) states that if the commissioner approves the plan, the region or solid waste authority, if one has been formed pursuant to part 9 of this chapter, by resolution and subsequent adoption of ordinances by counties and municipalities in the region, may also regulate the flow of collected municipal solid waste generated within the region. Prior to the adoption of any resolution declaring the necessity of requiring mandatory flow of municipal solid waste, the region or authority, following one (1) or more public hearings, shall demonstrate in writing to the commissioner that it has considered the utilization of any municipal solid waste management facility in existence within the region on July 1, 1991, which meets the proposed or final federal Resource Conservation and Recovery Act (RCRA) Subtitle D regulations. The region or authority must show that its decision not to use the existing facility is based on the fact that:*

- (i) Such facility is environmentally unsound or inadequate to meet the region's ten-year capacity assurance plan;*
- (ii) (a) Costs for the use of such facility are inconsistent with comparable facilities within the state; or (b) The existing facility is operating in a manner that is inconsistent with the plan; and*
- (iii) The waste subject to flow control will be sent only to a facility or facilities that meet all state and federal regulations.*

*(B) The region or authority may restrict access to any landfills and incinerators which dispose of municipal solid waste by excluding waste originating with persons or entities outside the region in order to effectuate the plan. If a facility within a region has accepted waste from a specific source outside the region prior to July 1, 1991, the region may not prohibit that facility from continuing to accept waste from that source, unless the facility's acceptance of that waste significantly impairs the region's ability to effectuate its plan.*

**SW Region Name:** Davidson

19

**A. FlowControlAttempt (Yes)**

**If Yes, provide details as outlined above including approval from the commissioner:**
