

Metro Nashville and Davidson County

The seal of the Metropolitan Government of Nashville and Davidson County is centered on the page. It features a central figure of a Native American man holding a bow and arrow, standing next to a woman. The seal is surrounded by a circular border with the text "METROPOLITAN GOVERNMENT OF NASHVILLE AND DAVIDSON COUNTY" and a sunburst pattern.

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Update local government waste reduction and recycling goals. *

Yes

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

The Solid Waste Region Board has been looking at the current 10 Year Plan recommendations and is considering a study on waste management options and a public input process for 2016.

Tire Report

Amount of Tires managed: * 6,761.18 tons

Amount of Tires sent to beneficial use: * 6,761.18 tons

Objective 2: Increase Recycling Access & Participation

Diversion Activities

Did your local government have any household hazardous waste events?*

1. Yes
2. No

Source Reduction Activities

Describe source reduction and reuse activities by public or private entities by jurisdiction.

List any restrictions the local government or region places on collected wastes (Examples: no cardboard allowed in MSW compactors, additional container charges, etc.)

July 1, 2011 - Yard waste banned from waste containers

July 1, 2012 - Trash cart fees for more than two carts

July 1, 2013 - Private haulers required to offer recycling and cardboard banned from waste containers

July 1, 2015 – Electronics banned from waste containers

List Curbside Recycling Programs by Jurisdiction

Does any local government have any curbside recycling programs?*

1. Yes
2. No

1. Curbside Recycling Program

Jurisdiction:*Davidson - Urban Services District

Participation Rate:*73

Check all materials collected in program:*

- Fiber/Paper
- Plastic

Metals

Is this program Separated or Co-mingled:*

Separated

Co-mingled

2. Curbside Recycling Program

Jurisdiction:*City of Oak Hill

Participation Rate:*0.00

Check all materials collected in program:*

Fiber/Paper

Plastic

Recycling Drop-off Locations

1. Bellevue Metro Transit Authority's Park & Ride
Coley Davis Road and Hwy 70 S
Nashville, TN 37221
Open 24 hrs.
Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers
2. Cane Ridge High School
12848 Old Hickory Blvd
Antioch, TN 37013
Open 24 hrs.
Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers
3. Granbery Elementary School
5501 Hill Road
Brentwood, TN 37027

Saturdays 9a.m. to noon

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

4. Hermitage Hobby Lobby

4101 Lebanon Road

Hermitage, TN 37076

Open 24 hrs.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

5. Hillsboro High School

3812 Hillsboro Pike. (Richard Jones Road to Hillmont, between baseball fields.)

Nashville, TN 37215

Open Monday through Saturday, 9 a.m. to 5 p.m. and Sunday, Noon to 5 p.m.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

6. Joelton Middle School

3500 Old Clarksville Highway

Joelton , TN 37080

Open 24 hrs.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

7. Lakewood City Hall

3401 Old Hickory Blvd

Old Hickory, TN 37138

Open 24 hours

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

8. McGavock High School

3150 McGavock Pike - Drop-off is located behind the school next to Two Rivers Park

Nashville, TN 37214

Open 24 hrs.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

9. Old Ben West Library Building Recycling Drop-off Point

Polk Avenue & Union Street

Nashville, TN 37219

Open 24 hrs.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, plastic bottles & containers **(NO GLASS)**

10. Tennessee State University

38th Ave N and Albion Street

Nashville, TN 37209

Daily 7a.m. to 7p.m.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

11. Waste Management Recycling

630 Myatt Drive

Madison, TN 37115

Monday-Friday 7a.m. to 4p.m.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

12. Whites Creek High School

7277 Old Hickory Blvd

Nashville, TN 37189

Open 24 hrs.

Accepts: newspaper, mixed paper, paper board, cardboard, aluminum, tin, glass containers, plastic bottles & containers

Problem Waste Management

Describe current problem waste management strategy. Include management descriptions for batteries, oil, paint, antifreeze, electronics and HHW materials.* Metro Public Works has two permanent household hazardous waste facilities open 7 days/ week to accept batteries, oil based paint, antifreeze, electronics and HHW. Additionally, all convenience centers accept electronics for recycling.

Waste Reduction & Recycling Obstacles

List and discuss the three largest obstacles to your waste reduction/recycling system:*Limited Obstacles include:

Limited funds for a broad, comprehensive education and outreach program. Nashville has a voluntary recycling program and continuing to communicate the importance and benefits of waste reduction and recycling is key.

As mentioned in the 10 Year Plan, the lack of a Metro operated waste disposal or processing facility in addition to the lack of any state-wide material bans is a challenge. Though Metro has implemented regulatory measures banning cardboard, yard waste and electronic waste from trash containers in Davidson County, enforcement of these and future regulations is difficult without operating a waste handling or disposal facility, or having state-wide bans in place on certain material going into landfills.

Limited composting or digestion options for large food waste producers to divert organics.

Describe the growth trends, waste projections, and system structure of the region.* Davidson County is a vibrant region with the population growth rate consistent to Table 5-1 of the 10 Year Plan. Because Metro Public Works controls only about 19% of the solid waste stream in the region, Public Works is reliant on private entities for information regarding tonnage numbers for landfilled and recycled materials. This makes reliable calculations and future projections very difficult to calculate without state reporting regulations in place. 2015 class I landfilled waste was up slightly from 2014.

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Implement a Recycling Grant Plan. *

Yes

No

Support drop-off sites for residential collection where curbside not feasible. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Public Works has 12 recycling drop-off sites and 4 convenience centers located throughout the county. These locations provide residents without curbside recycling the opportunity to recycle. The 4th convenience center, located on Ezell Pike in the southern part of Davidson County opened in January 2016.

Support enhancement of curbside and local government recycling programs. *

- Yes
- No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

On July 1, 2013, all waste haulers providing service to residents and businesses within Nashville and Davidson County were required to offer a recycling option to their customers. Businesses, apartments and condos with trash dumpsters now have the option, with their waste hauler or other recycler, to have a recycling dumpster placed at their location. Residents that contract for trash collection privately are also offered recycling options by their haulers

Work with partners to encourage sustainable materials management by businesses and industry. *

- Yes
- No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Public Works is supporting Resource Capture, Inc.'s proposed anaerobic digestion facility. This proposed facility will be a public/private partnership with Metro providing property for the facility. Exact date for construction is TBD.

Increase recycling access and participation in state government facilities. *

- Yes
- No

Increase diversion of construction and demolition. *

- Yes
- No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Public Works is in the process of updating Metro Code 10.20.360 to remove reference to fees as it relates to C&D recycling. While Metro was not charging a fee for recycled C&D waste, the current wording caused confusion among recyclers. This change to the Code should be complete in late Spring 2016.

Increase diversion of electronics. *

- Yes
- No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

On July 1, 2015 Metro Nashville instituted a ban on electronics in waste containers. Residents can take electronic waste for recycling to the East, Omohundro and Ezell Pike convenience centers. The Ezell Pike center opened in January 2016.

Increase diversion of HHW and BOPAE. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

In January of 2016 Metro Public Works opened the second permanent household hazardous waste facility in Davidson County. This second facility is located at the Ezell Pike Convenience Center in the southern part of Davidson County. Having two locations, open 7 days/week make it easier for residents to drop-off batteries, oil, electronics and household hazardous waste.

Objective 3: Promote Material Processing and End Use in Tennessee

Recycling Hub and Spoke Program

Do you operate a grant funded Hub or Spoke?

Yes

No

Recycling Rebate

Did this county (including municipalities) qualify for a recycling rebate?

Yes

No

Jurisdiction: Nashville & Davidson County

Please describe how funds were used, and how they sustained or improved recycling for local governments. Also, please provide a county recycling report for local governments who recycled the recycling rebate.

The Recycling Rebate funds were used to offset recycling employee salaries and benefits.

Facility

Provide the Name and Physical Street Address of the Facility(s) where your recyclables (paper, plastic, glass and metal) are taken, sorted, and prepared for market, after they are collected at your convenience centers, through your curbside program, or other collection points.

1. Facility

Name*Waste Management

Address*208 Riverhills Dr

City*Nashville

Zip*37210

2. Facility

Name*Waste Management

Address*630 Myatt Dr

City*Madison

Zip*37115

2025 Statewide Solid Waste & Materials Management Implementation Plan

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Develop region recycling Hubs where collection and delivery to processors or end users remains cost prohibitive. *

Yes

No

Seek and facilitate opportunities for public/private partnerships for the collection and processing of recyclables. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Public Works and Metro Government is partnering with Resource Capture, Inc. to locate an anaerobic digestion facility in Davidson County. This public/private partnership would involve Metro providing property for the facility.

Support the development or enhancement of online tools to facilitate materials processing/marketing. *

Yes

No

Support the development of scrap tire processing and end markets for tire-derived materials. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Nashville & Davidson County will support any efforts on the part of the State to expand recycling options for tires. Currently, only one tire recycler exists in our region and additional options would benefit all county tire recycling programs.

Incorporate sustainable materials management considerations in public purchasing decisions.

*

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

The Metro Nashville Finance Department has a Green Procurement Initiative (GPI). The GPI program assists Metro Government agencies in implementing strategies to prevent waste and pollution by considering environmental impacts along with price, performance, product safety, and availability when evaluating solicitation offers for products and services. Metro Nashville's Procurement Division has adopted the following policies and procedures as part their solicitation and contracting process:

- To incorporate environmental considerations in the evaluation process.
- To increase its fleet of energy efficient vehicles.
- To encourage the selection of sustainable products.
- To seek the selection of recycling and repurposing solutions.

Objective 4: Increase Diversion of Organics

Diversion of Organics

Describe the region's current composting, solid waste processing, waste-to-energy, and incineration capacity and strategies. Note any future or expected changes. *

There is currently no waste-to-energy or incineration capacity in the region. There is one commercial composting facility which services the region which is supported by multiple haulers. We have plans to support an anaerobic digestion facility in the region in the coming years. There is currently one public, and multiple private sites which process yard waste for mulch and leaf compost production.

2025 Statewide Solid Waste and Materials Management Plan

Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement. Provide information to businesses and citizens about ways to reduce disposal of food residuals. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

Metro Public Works provides composting education for businesses and residents, and provides a location to purchase backyard composting and organics digestion supplies all year. Public Works provides educational information on its website, offers educational outreach programs to schools, businesses, and organizations of any type throughout Davidson County. Public Works also donates compost bins and other supplies to public schools in the region wishing to start small scale composting projects. Public Works will continue to support food waste diversion from businesses by maintaining a "Recycling Service Providers" information section on its "Business Recycling" webpage.

Dedicate resources to expand collection, processing, and end use of residential organics. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

All planned dedicated resources for residential organics will focus on backyard composting/digestion, and providing information regarding available commercial services for collection/processing. Metro Public Works will continue its composting and backyard digestion educational efforts, and continue to try to find new ways to encourage residential food waste diversion.

Increase composting/processing of organics generated at county-owned and/or state facilities. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

When available, Public Works provides for diversion of organics at events such as the Nashville Earth Day Festival. Because there is no permitted organics processing facility within the region, however, significant organics diversion from state/county buildings is not feasible.

Provide financial, technical, and/or local ordinance support to implement organics processing at one or more institutions/commercial locations. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

The region would be interested to promote policy change affecting organics at the commercial level, though adequate infrastructure does not currently exist in the region to support these measures. We currently, and will continue, to offer education to businesses and institutions within the region regarding organics diversion opportunities and potential best practices.

Support organics recovery with updated policy. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

As mentioned above, the region would be interested in supporting policy changes effecting organics once adequate infrastructure is available within the region.

Objective 5: Support New Waste Reduction & Recycling Technology

New Technologies

In the coming years, what new programs, or modifications to existing programs, will be enacted to increase the amounts of material being reduced/recycled? *

On 1/25/16 Metro began collection operations at the Ezell Pike Convenience Center, Davidson County's 4th Convenience Center/2nd HHW collection site. This new location will increase recycling availability for residents to divert traditional recyclables and other items such as appliances, electronics, mattresses, batteries, carpet & carpet pads, and provide another location for HHW drop-off seven days per week. We will continue installation of pedestrian recycling receptacles in the Nashville downtown core. The city also plans to work with an organization which will install and operate an anaerobic digestion facility to increase the diversion of organics.

In the coming years, what new waste reduction and recycling technologies will be utilized in your programs? *

The city plans to support a new anaerobic digestion facility which will increase diversion of organics.

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Ensure state policy supports new waste reduction and recycling technology. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

We plan to support the anaerobic digestion facility which is being largely funded by state grant funds.

Provide guidance to local government as they consider new waste reduction and recycling technologies. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

We seek and provide guidance wherever needed, and plan to continue providing support and feedback to local AD organizers, reuse organizations, and governmental departments seeking to strengthen recycling programs.

Work with partners to identify and support projects using new technology that may help achieve state waste diversion and recycling goals. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement: *

We are working with the Natural Resources Defense Council to develop a new food recovery and food waste diversion project in Nashville. This program will hopefully run concurrently with a national television commercial campaign, developed by The Ad Council focusing on food waste reduction. The region is working to support the efforts of a local non-profit which seeks to initiate an anaerobic digestion facility in the region.

Objective 6: Expand and Focus Education & Outreach

Past Education Efforts

Program	Sponsor	Type	Target	Attendees	Description
The Adventures of Enviromutt	Metro Public Works/ TDOT	Puppet Show	Children	1001-5000	This is a 30-minute puppet show for Pre-K - 2nd grade students which focuses on recycling and litter prevention.
Trees Are Terrific/Trees Too!	Metro Public Works/TDOT	Classroom	Children	1001-5000	This is a 30-minute tree education program for PreK – 4th grade students which focuses on the importance of trees, recycling, and litter prevention.
Curby's Recycling Story Time	Metro Public Works/TDOT	Classroom	Children	501-1000	This is a 30-minute program for PreK-2nd grade students which focuses on recycling and litter prevention.
Recycling Education Station	Metro Public Works/TDOT	Classroom/ Tour	ALL	501-1000	All Davidson County residents, school groups, neighborhood associations, civic organizations, business groups, etc., and invited to visit the recycling classroom which is located at Metro's contracted materials recovery facility. The program generally lasts about one hour, and visitors learn about litter prevention, neighborhood clean-ups, why recycling is important, how to best participate, and what happens to recyclables after being collected curbside, or at school, business, or other location.
Scout Badge Program	Metro Public Works/TDOT	Classroom/ Community Outreach	Children/ Civic	51-100	Scouts earn a Metro Beautification badge for participating in various environment-related activities such as recycling collections, neighborhood clean-ups, composting, or planting trees/flowers.
Compost Bins for Schools	Metro Public Works/TDOT	Classroom	Children	1001-5000	A composting education program for students of all ages. Metro Public Works donates or loans compost bins and worm compost bins to Davidson County public schools, and provides compost education for any school interested in starting or maintaining a compost project.
Curby's Recycling Roadshow	Metro Public Works/TDOT	Classroom	Children	101-500	This is a 30-minute recycling and litter prevention outreach presentation for 3rd - 4th grade students.

Nashville Beautiful Art Contest	Red River/Metro Public works	Contest	Adult/Children	County-wide	3rd and 4th grade public school students are invited to create a themed two dimensional artwork. The two best from each school are judged by a panel, and the 4 top County-wide winners receive monetary prizes from the school's art program. All work submitted by schools are made into banners which are attached to the sides of Red River collection trucks throughout the year. The trucks even visit the school from which their art was created.
Recycling for Adults	Public Works/TDOT	Classroom	Adult/General Public	501-1000	Public Works offers recycling outreach education programs for businesses, neighborhood associations, places of worship, and any other organizations within the region.
Various Events	Metro Public Works	Community Outreach	Adult/General Public	County-wide	Public Works staffs booths at various event throughout the year which are open to the public. At these events, staff provides booth visitors with recycling information, litter prevention information, and general information about responsible materials management and other services provided by Public Works.

Please describe the marketing and educational initiatives you plan in the next year.*

We plan to have a strong and growing social media presence on multiple platforms. We advertise on our website, Metro 3 (local government information TV station) for which we plan to create a new anti-contamination recycling video which will hopefully interest all ages. We are working with the TN Recycling Coalition to create a series of state-wide radio PSA recordings. Plan to continue working with local radio, news stations, and neighborhood papers to spread information about recycling and various events at which recycling will be a point of focus. Public Works is also working with the Natural Resource Defense Council to develop a food recovery and food waste diversion pilot within the region, which will be accompanied by a national TV commercial campaign from The AD Council.

Describe current waste reduction strategies for the region. Include effectiveness. If positive waste reduction efforts are not occurring, describe why and lay out strategy with timeline to address negative result efforts.*

Public Works currently maintains 12 neighborhood recycling drop-off locations, 4 convenience centers two of which are HHW collection sites, and offer curbside recycling to roughly 128,000 residences within the region. We also provide pedestrian-friendly recycling containers for collection in the central business district in downtown Nashville. Metro Government employees operate under a mandatory workplace recycling program. The region has placed material bans for waste containers for OCC, electronics, and brush. We plan to continue to find ways to increase curbside participation rate and reduce contamination. Because Public Works does not own/operate a landfill or transfer station, there is no conclusive way to know exactly how effective material bans have been. As discussed above, Public Works provides recycling and waste reduction information and educational materials through multiple forms of media, in multiple languages, and in a manner befitting the target age group/demographic. We feel each of these efforts is effective, but as seen above, will continue to explore additional means and partnerships to expand our message of the importance of waste reduction and proper recycling.

Describe public information and education strategy, target, and general effectiveness.*

Public Works attempts to provide appropriate educational programs for all citizens in the region, in many forms, multiple languages, and for all ages groups. As described above, Public Works is attempting to reach all citizens in the region. We feel these efforts are effective, and we continue to find new ways to expand our reach.

Describe current recycling strategies. If capture rate for commodities are less than the percentage described in the region's plan for available materials, what will be done to address this issue. Give time table of projects, responsible parties, and method to determine success that will be used to attain this.*

We collect recyclables at 4 convenience centers, 12 neighborhood drop-off sites, 150 pedestrian bins downtown, and all Metro buildings, offer curbside collection to roughly 128,000 residences, provide 4 brush/yard waste collections annually for all single-family homes in the region, and recycle items from bulk item pick-ups offered to all single-family homes in the region. We offer educational materials and outreach presentations through multiple forms of media which we feel are appropriate for reaching the vast majority of the regions residents. There are improvements which we would like to make, such as increasing curbside recycling frequency, but this type of strategic change requires a significant capital investment which the current budget provided cannot support.

Describe your successes in the implementation of your Solid Waste Management Plan. What are you doing well to promote waste reduction:*

We feel the educational efforts are effective, though we continue to find new ways to expand our message to a growing regional population. Recycling availability is at an all-time high given that we now have our 4th convenience center in operation. We support extensive efforts to educate and support

reduction and recycling efforts at every stage of waste origination. We also succeed in finding new ways to partner with organizations and businesses to reach regional citizens and schools in creative new ways. For example, we are working with Turnip Green Creative Reuse in it's development of reuse and recycling education classes it will provide at it's educational studio facility in downtown Nashville.

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Develop a statewide recycling campaign.*

1. Yes
2. No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

We are working with the TN Recycling Coalition to create recycling themed radio PSA-type announcements which will be aired in East TN by Bristol Broadcasting, but will have the potential to be shared state-wide. We are also creating an anti-contamination educational video for use by the region, but will be happy to share with any region within the state who would care to promote it. We are working with the Natural Resources Defense Council on a food recovery and food waste diversion initiative in the hopes of creating a pilot program which could be used as a model in other cities and states. This pilot will run concurrently with a national food waste campaign created by The AD Council and NRDC.

Promote sustainable materials management in Tennessee schools and public institutions.*

1. Yes
2. No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

The above strategies will apply to schools and other institutions as well. We also promote state-wide and national programs created by Keep America Beautiful, such as Recycle Bowl which is an annual school recycling competition for which schools compete at the local, state, and national levels. All of our education outreach programs are offered to schools within the region at no cost. We also plan to work with the contracted hauler for public schools within the

region to find new ways to increase and improve the quality of recyclables at schools in the region.

Promote sustainable materials management to Tennessee businesses.*

1. Yes
2. No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement*

We work with the TN Recycling Coalition which is a network of local and state governments, businesses, citizens, and organizations to promote recycling state-wide. We provide information on our website for businesses looking for service providers who can increase business recycling within the region and beyond.

Promote HHW services to local governments and assist them in promoting HHW and BOPAE collection services.*

1. Yes
2. No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

Public Works currently operates 2 HHW collection points in the region which are both open 7 days per week. Davidson County is the only county in TN which has more than one HHW site, and the only county to have HHW collection available every day. We are more than happy to share our tactics for success and information so other regions might model our success in HHW collection.

Objective 7: Ensure Sufficient & Environmentally Sound Disposal

Solid Waste Planning

List and discuss the three largest obstacles to your solid waste disposal system*

As mentioned in the Region's 10 Year Plan section 4.10, the biggest weakness of the disposal system is "its reliance on a single, privately-owned transfer station and a single contractor to provide transfer, hauling and disposal services to metro and other local governments for the non-recycled MSW generated in the region." An additional obstacle to the region's disposal system is the lack of any commercial compost options. Probably the most limiting factor is that Metro Public Works only controls a fraction of the waste generated in the county. Approximately 79% of the waste disposed in Class I landfills and all waste disposed in Class III-IV landfills falls outside the control of the department. Every effort is made to reach out to private businesses, institutions, and residents in the General Services District and satellite cities to promote waste reduction and recycling.

In the coming years, how do you plan to handle disposal of waste differently to better address these issues*

Modification to the current system would be dependent on funding.

Looking back on the Plan from this current year, what changes have been made in the way the county handles & prioritizes Solid Waste*

Metro Public Works opened a new convenience center and household hazardous waste facility in the southern part of Davidson County to provide residents in this area of the county with more convenient access to recycling services.

Description of the Municipal Solid Waste Region

State or revise current responsibilities of each local government in the region by

jurisdiction.*Each of the local governments (other than the City of Forest Hills) provides trash and recycling service for residents. All residents of Nashville and Davidson County have access to trash and curbside recycling collection either through city funded programs or by contracting directly with a private hauler.

Describe and provide an analysis of the Current Solid Waste Management System within the

region.*The majority of the waste collected in Nashville and Davidson County is picked up by either city staff, city contractors or private contractors and is transported to one of two waste

transfer stations within the county. The waste transfer stations are owned by Waste Management, Inc. and Republic Services. Class I landfilled waste is then transferred out of the region to privately owned landfills. Recyclable materials are collected by city staff, city contractors, and private contractors and taken to private materials recovery facilities for processing.

Describe current waste collection and transportation systems. Include any expected changes or revisions to this plan.*Waste is collected by a combination of government services and privately contracted services. As mentioned above, the majority of the waste goes to one of the two privately owned waste transfer stations in the county. No changes to this system are expected in the next year.

What is the current disposal capacity for the solid waste processing facilities used by the region?*Middle Point LF: 6-8 years , West Camden LF: 25+ years, Cedar Ridge LF: 2 years, Bi County LF: 5 months, Southern Services C&D Landfill – 5 years, MS-COT – 1 month.

Waste Stream Estimate

Give approximate percentages of each category of waste that make up your county's MSW stream.

Residential – 38%

Commercial – 42%

Institutional – 10%

Industrial – 10%

Convenience Centers

1. Convenience Center

East Center

943A Doctor Richard G. Adams Drive

Nashville, TN 37207

(615) 862-8631

Hours: Mon.-Sat. 7:30am-5:00pm and Sun. Noon-4:00pm

Ezell Pike

5113 Harding Place

Nashville, TN 37211

(615) 880-2530

Hours: Mon.-Sat. 7:30am-5:00pm and Sun. Noon-4:00pm

Omohundro

1019 Omohundro Place (entrance on Freightliner Drive)

Nashville, TN 37210

(615) 880-1955

Hours: Tue.-Sat.: 8:00am-4:30pm

Anderson Lane Center

939A Anderson Lane

Madison, TN 37115

(615) 860-2588

Hours: Tues.-Sat.: 8:30am-5 pm

Convenience Center Summary

Please identify ANY changes that occurred to your convenience center(s)?

In 2015, Davidson County added a fourth convenience center with an HHW facility. The Ezell Pike center is located off of Harding Place in the southeastern part of the county where service had been lacking.

The State of Tennessee will input the number of County Convenience Centers required as computed using this worksheet (click here):

Total number of Convenience Centers present in jurisdiction:4

Difference:-4

If you have fewer convenience centers than are required, what steps will be taken to provide collection assurance?

Does your local government have any recycling drop off locations not associated with convenience centers?*

List Higher Level of Service-Alternative Disposal Collection Systems

Does any local government have curbside waste collection (Higher Level of Service-Alternative Disposal Collection System)?*

- Yes
- No

1. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*Davidson County - Urban Services District

Public program percentage of coverage within the jurisdiction:*30.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*70.00 %

Privately contracted programs percentage coverage within the jurisdiction:*0.00 %

Total percentage of each category of service for the jurisdiction100.00

2. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*Davidson County - General Services District

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*0.00 %

Privately contracted programs percentage coverage within the jurisdiction:*100.00 %

Total percentage of each category of service for the jurisdiction100.00

3. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*City of Berry Hill

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*100.00 %

Privately contracted programs percentage coverage within the jurisdiction:*0.00 %

Total percentage of each category of service for the jurisdiction100.00

4. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*City of Oak Hill

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*100.00 %

Privately contracted programs percentage coverage within the jurisdiction:*0.00 %

Total percentage of each category of service for the jurisdiction100.00

5. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*City of Forrest Hills

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*0.00 %

Privately contracted programs percentage coverage within the jurisdiction:*100.00 %

Total percentage of each category of service for the jurisdiction100.00

6. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*City of Belle Meade

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*100.00 %

Privately contracted programs percentage coverage within the jurisdiction:*0.00 %

Total percentage of each category of service for the jurisdiction100.00

7. Higher Level of Service-Alternative Disposal Collection System

Jurisdiction:*City of Goodlettsville

Public program percentage of coverage within the jurisdiction:*0.00 %

Publicly contracted programs percentage coverage within the jurisdiction:*100.00 %

Privately contracted programs percentage coverage within the jurisdiction:*0.00 %

Total percentage of each category of service for the jurisdiction100.00

Public Collection (Green Box)

Does your local government have any green boxes?*

1. Yes
2. No

Transfer Stations

Does your local government have any transfer stations?*

1. Yes
2. No

Publicly Owned/Operated Landfills

Does your local government have any transfer stations?*

1. Yes
2. No

Is a method provided to receive complaints from the public related to solid waste issues? *

Yes

No

Provide the total number of reported solid waste complaints: * 23,084

Provide the number of solid waste complaints resolved: * 23,084

Describe the nature of the complaints: *

Missed waste and/or recycling collection by Metro or contracted hauler, cart damage, property damage resulting from waste/recycling/brush collection, general waste or recycling inquiries.

Roadside Dumps

List the locations of the largest five roadside dumps and the materials that make up these dumps.

#	Locations	Materials	Dump Tons
1	Oriel Ave	Trash, Bulk Items, Tires	734
2	Wheless St	Trash, Bulk Items, Tires	
3	Hickory Park Dr & Sycamore Ct	Trash, Bulk Items, Tires	
4	Old Glenrose	Trash, Bulk Items, Tires	
5	Culbertson Rd & Nolensville Pk	Trash, Bulk Items, Tires	

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Continue to monitor Class I landfill development, usage, and remaining capacity. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

Class I, as well as Class III-IV landfill capacity is being monitored regularly to determine if disposal capacity will meet the needs of the region.

Review and consider strengthening environmental regulations/policies relative to solid waste management facilities. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

The Davidson County 10 Year Solid Waste Plan includes going above current requirements for landfill liner. The 10 Year Plan requires that all C&D landfills have both top and bottom liners on any new or expanding C&D landfill.

Continue to address illegal disposal of materials. *

Yes

No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement:*

Addressing illegal dumping and material disposal is an ongoing process. Appropriate disposal of pharmaceuticals is handled through drop boxes located at all Metro Nashville Police Precincts and promoted by Metro Public Works and Metro Water Services. Additionally, Nashville's two household hazardous waste facilities provide not just the access but education on appropriate disposal of household hazardous waste.

In addition to these efforts, Public Works inspectors investigate illegal dumping and can issue citations or take individuals to environmental court.

Objective 7: Ensure Sufficient & Environmentally Sound Disposal

Solid Waste Management Program

Describe any setbacks encountered in your solid waste management program and how these setbacks will be resolved in future plans: *

Please see Objective 7, Solid Waste Planning on "Obstacles to the Solid Waste Disposal System." Briefly describe the current level of staff and how the program is funded. *

Briefly describe the current level of staff and how the program is funded.*

Funding for waste and recycling comes from either the general fund or the solid waste fund. For fiscal year 2016, there are 102 full time and 5 part time employees.

Improvements Remediation

Facility Improvements - Project any facility improvements needed for processing and/or managing solid waste and diversion efforts: *

No facility improvements are anticipated at this time.

Monitoring Cost Projections - Project any future monitoring, remediation, or mandated improvements over the next five years by the county for county owned solid waste facilities, including but not limited to, convenience centers, transfer stations, active landfills, or landfills in post-closure monitoring: *

These are the monitoring costs incurred in 2015 for the listed landfills.

- Bordeaux Landfill = \$69,058.94 (This annual cost will be typical for the foreseeable future)
- Thermal Ash Monofill = \$6,672.57 (This annual cost will be typical for the foreseeable future)
- Due West Landfill = \$465.57 (Due West LF is being phased out of the VOAP program, no further monitoring will be required)
- Lebanon Road Landfill = \$0.00 (Lebanon Road LF is being phased out of the VOAP program, no further monitoring will be required) River Hills Landfill = \$6,187.75 (This annual cost will be typical for the foreseeable future)

Green Boxes

According to rule 0400-11-01-.10 5(a) requires each county to include in their Annual Progress Report a plan for eventual elimination of collection receptacles or conversion of unmanned collections site to manned convenience centers. Please summarize and describe below the county's plan to eliminate or convert green box site(s) to manned convenience center(s). Please also describe expenses that may occur during the transition and additional funding needed. *

Davidson County has no Green Box sites. There are 4 staffed convenience centers in the county.

Pay as You Throw

Does your local government have PAYT? *

Yes

No

Financial Information Survey

Expenses

EXPENSE ITEM	AMOUNT (\$)
51000 General Administration	\$ 2,805,574.99
55731 Waste Pickup	\$ 9,394,229.90
55739 Other Waste Collection	\$ 2,280,885.55
55751 Recycling Center	\$ 1,371,282.78
55752 Compost Center	\$ 178,841.95
55759 Other Waste Disposal	\$ 6,241,962.97
55770 Post Closure Care Costs	\$ 413,334.43
70000 Education	\$ 145,952.78
TOTAL EXPENSES	\$ 22,832,065.35

Revenues

REVENUE ITEM	AMOUNT (\$)
40000 Local Taxes	\$ 29,589.08
43108 Convenience Center Waste Collection Charge	\$ 462,908.89
43112 Surcharge - Host Agency	\$ 23,753.51
43113 Surcharge - General	\$ 4,322,343.08
44145 Sale of Recyclables	\$ 463,754.89
46170 Solid Waste Grants	\$ 772,553.91
48000 - Other Governments and Citizens Groups	\$ 666,874.02
49800 - Transfer from General Fund	\$ 12,796,700.00
TOTAL REVENUES	\$ 19,538,477.38

2025 Statewide Solid Waste and Materials Management Plan Implementation

Please select the strategy(ies) your Region is/are incorporating in the Regional Solid Waste Plan and describe the tactic(s) your Region is/are using to implement.

Consider increasing tipping fee surcharges on disposed solid waste.*

1. Yes
2. No

Raise revenue for waste reduction, recycling, and integrated solid waste management from new sources.*

1. Yes
2. No

Support the development of sustainable funding strategies for local programs.*

1. Yes
2. No

Describe your tactic that is planned to be implemented, who are the responsible parties and the target date of achievement*

The region supports any efforts on the part of the State to develop sustainable funding strategies.

Disaster Debris Management

Does your local government have a Disaster Debris Management Plan?*

1. Yes
2. No

Is the Plan Modeled after FEMA's PA325 Plan?*

1. Yes
2. No

Has it been accepted by TEMA and FEMA?*

1. Yes
2. No

Are pre-event contracts in place? *

1. Yes
2. No

With whom and for what service:*DRC Emergency Services, LLC - removal of disaster related debris

Are staging areas identified?*

1. Yes
2. No

Where?*

Staging areas are dependent on the nature of the debris to be managed. There are three mixed debris staging areas: 1. Donelson/BNA 2. Warner Park 3. Metro Center

How is Waste Reduction and Diversion addressed in the local disaster debris management plan?*Where possible wood waste and metal items are collected separately for recycling.

Comment on any disaster related solid waste activities that may have influenced diversion efforts with your local government*

We had none in 2015.
