Notes:

The sign shall be limited to no more than 6'-6" in height and 17'-0" in length with a total maximum sign area of 48 square feet per side. The digital component of the sign is limited to 24 square feet per side.

All portions of the message must have a minimum duration of eight seconds and must be a static display. There shall be no appearance of a visual dissolve or fading, in which any part of one message, image, or display appears simultaneously with any part of a second message, image, or display. Further, there shall be no appearance of flashing or sudden bursts of light, and no appearance of video motion, animation, movement, or flow of the message, image, or display. The intensity and contrast of light levels shall remain constant throughout the sign face. The electronic components of the sign shall shut off between the hours of 10:00 pm and 6:00 am, and shall use automatic day/night dimming software to reduce the illumination intensity of the sign from dusk until 10:00 pm.

The maximum brightness levels shall not exceed 0.2 (two tenths) foot-candles over ambient light levels measured within 150 feet of the source. Certification must be provided to Metro by the sign company prior to the issuance of the sign permit.
