

Trash the wipes. Don't Flush.

Toilets are only meant for one activity, and you know what we're talking about! When the wrong thing is flushed, results can include costly backups on your own property or problems at your local wastewater treatment plant. That's why it's so important to treat toilets properly and flush only your personal contributions to the local wastewater treatment plant.

Please don't flush baby wipes, diapers, plastic items of any type, food wrappers, cigarette butts, hair, cotton swabs, syringes, and other "trash" items. To learn more, visit www.nashville.gov/water and click on Public Education.
