

Promenade with Open Spaces/Nodes

Douglass

Connectivity is poor to Dickerson corridor

CAP this

This bridge portion is not friendly to pedestrians

Utilities are unsightly

East Park

Woodland Street bike lanes to Five Points

Improve Woodland & Main through to Downtown in the short term

Green space

Large mixed use development that activates the street

Connection to Envision Cayce campus

The fences along the interstate are a horrible entrance to the East Bank -- focus on improved gateways

Interstate gateway

Lots closed between/near pedestrian bridge

Better connecting to neighborhoods

Make structured parking more robust and surround it by businesses. Surface parking needs to go.

Hidden

Continue greenway access along the riverfront

Activate the areas surrounding the stadium to bring people through the neighborhood but not to the neighborhood -- create a connection to FivePoints and a guided path through

Noise from Broadway makes sitting at the river unappealing directly across from Broadway

Bridge Building is a lost opportunity to public access

- No commerce
- No restrooms
- Snacks
- Signs/Places to Explore
- Floral
- Art/Storywalk
- Doesn't encourage people to stop and rest
- Allow for vendors along/near Ped Bridge

Nashville builds too many "lawns" -- include more amenities for everyday use in parks

### General Notes

- Keep streets at human-scale
- Street trees are a must
- Focus on healthy transition from historic East Nashville communities to height and density
- Encourage appealing architecture, run with the artistic nature of East Nashville
- So much opportunity to access the river, keep public access on the river
- Opportunity for commerce along I-24
- Keeping East Bank incognito is a little of a positive in order to keep it grassroots and more accessible to blue collar residents
- River is uninviting. Right in front of Nissan is the perfect place to access river.
- Story walk along the river explaining history would be nice.
- Linear art festivals and other locally-focused events could be held along river.
- Meeting the water is critical for East Bank.
- General lack of maintenance in public spaces/parks
- Constraints for money generation
- Who is the target "audience" for city?
- Downtown = tourism; East Bank = ?
- What are flood/USCG constraints now?
- Food & music venues
- Signage missing
- Identification markers
- Pavilions
- Missing accessibility to buildings and green spaces
