Capital Improvements Budget

ORGANIZATION

This Capital Improvements Budget is organized into three sections:

- I. **Projects in the Urban Services District:** a brief listing.
- II. **Projects in the General Services District:** a brief listing.
- III. **Detailed project listings:** Project details organized by groups of departments.

BACKGROUND

The Charter of the Metropolitan Government for Nashville and Davidson County requires that the Planning Commission submit a list of recommended capital improvements that are necessary or desirable to be constructed or provided during the next six years.

This Capital Improvements Budget is a planning tool to prioritize and coordinate investments in long-term, durable improvements. Investments are considered to be capital improvements when they:

- Have a lifetime greater than 10 years and
- Cost more than \$50,000.

Capital improvements include Metro facilities, equipment, and infrastructure (capital investments that shape private activities, such as deciding where to live, start a business, or invest). The Planning Commission's role is most closely tied to infrastructure, which should be coordinated with land use regulations.

Funding most capital improvements involves two documents, enacted by ordinance or resolution:

- **The Capital Improvements Budget (CIB):**
All capital improvements requested from Departments with a six-year time horizon. By Charter, any capital improvements must be included in the Capital Improvements Budget.
- **Capital Spending Plan:**
Recommended projects during the first fiscal year of the CIB, proposed to be funded through General Obligation bonds. The Mayor submits the Capital Spending Plan to the Metro Council, which adopts it through a bond resolution.

Other capital improvements are funded through ordinances or resolutions authorizing the use of 4% funds, operating funds, or revenue bonds. For more information on funding sources, see page v.

FY2022-23 OVERVIEW

This section provides an overview of the Capital Improvements Budget as a whole.

Spending requests by year

The FY2022-23 Capital Improvements Budget includes requests for \$16.5 billion. That spending is phased over the current fiscal year (FY2022-23) plus five further years (FY2023-24 through FY2027-28). Some departments also track requests across ten years (through FY2031-32), adding an additional \$3.0 billion in requests.

Spending requests by department group

Departments are grouped into one of six clusters to organize the Capital Improvements Budget. The FY23 CIB reorganizes some Department groups. Standalone requests from Metro Council members (previously included in the Facilities & Technology cluster) are now separate. Requests from the Metro Transit Authority and Nashville Department of Transportation are now grouped together in the Transportation cluster. Finally, a new Department listing has been added: Administrative projects not attached to specific Departments are included in with the Facilities & Technology cluster.

PROJECT TYPES

- **Capital asset (one-time):** A capital asset is a new or rehabilitated physical asset that is nonrecurring (i.e. purchased once), has a useful life of more than ten years, and is expensive to purchase.
- **Capital program:** A capital program is a collection of smaller infrastructure improvements organized by an overarching plan.
- **Asset protection:** Asset protection involves major renovations or improvements to existing facilities that would extend the useful life and/or add value to the asset.
- **Study or plan:** Funding for a study or plan.
- **Contingency:** Funding for project start-up and unexpected costs.

Spending requests by project type

Requests in Capital Improvements Budget are identified by type of project, such as creating a new asset, capital program, major asset protection, or a study or plan.

SPENDING REQUESTS BY FUNDING SOURCE

Requests in the Capital Improvements Budget are identified by the source of funding.

FUNDING SOURCES

- **General obligation bonds:** Spending for G.O. Bonds is approved through a bond resolution, which incorporates the Capital Spending Plan.

Most Metro capital projects, with the exception of water and sewer projects, are funded by G.O. bonds.

Most projects request new G.O. bond spending. Some projects, particularly public art projects funded through the 1% for Art ordinance, reflect already approved G.O. bonds and need no further authorization.

- **Revenue bonds:** Revenue bonds are backed by a single source of revenue. Revenue bonds supported by Metro agencies must be authorized by Metro Council.

The largest user of revenue bonds is Metro Water Services, which uses water and sewer revenues to support bonds for water and sewer projects, including Clean Water Nashville. The Sports Authority (which oversees Nissan Stadium, Bridgestone Arena, and First Tennessee Park, among others), is the other primary user of revenue bonds.

Funding Method	Spending requests	
	in the CIB	Beyond the CIB
C Proposed G.O. Bonds	\$10,390,049,100	\$3,021,836,500
E Proposed Revenue Bonds	\$2,741,170,500	\$0
A Miscellaneous Funds	\$1,725,500,000	\$0
F Federal Funds	\$778,750,000	\$0
G State Funds	\$695,385,000	\$0
M Proposed 4% Funds	\$46,459,100	\$4,800,000
H Enterprise Funds	\$44,300,000	\$0
B Approved G.O. Bonds	\$22,912,500	\$0

- **4% Funds:** These funds are set aside by the Metro Charter for equipment and repairs. Spending is typically allocated through quarterly omnibus resolutions that specify requests from multiple departments.
- **Enterprise funds or operating budget:** Enterprise funds include revenue generated dedicated to particular departments or programs. These are essentially operating revenue that can be used for some capital projects. Capital projects can also be paid directly from the operating budget, though this is rarely done.
- **Federal or state funding:** Grants from the federal or state governments. Typically, grants for capital projects require a portion of the project's funding to be provided by Metro through one of the above sources.
- **Miscellaneous funds:** Funds from another source. The exact funding source is specified in the project description.

Spending by major programs

Most spending requests in the Capital Improvements Budget reflect major ongoing capital programs that work throughout the county. The one- and six-year requests for these programs are shown at right. These programs account for \$8.1 billion of \$15 billion in capital requests for the next six years.

TAX DISTRICT

Sections I and II list projects funded from the Urban Services District (USD) and General Services District (GSD), respectively.

In 2019, Metro's tax base for property taxes was \$124 billion. Because that asset contributes more than half of Metro's budget, understanding how land is taxed throughout the county is important. Property taxes in Nashville take two forms. The General Services District (GSD) covers the entire county, including satellite cities. Taxes from the GSD pay into all parts of the general operating fund. The Urban Services District (USD) includes only part of the county. The USD levies property taxes in addition to the GSD. These taxes pay for increased police and fire protection, refuse collection, and street lighting.

PROJECT DEVELOPMENT

Infrastructure departments or those with substantial capital requests typically develop and maintain ongoing capital plans. Water Services, Public Schools, Public Works, MTA, Parks, and Libraries are all examples of departments with recently updated capital plans. Typically, these plans seek to balance maintaining or improving existing facilities with expanding services to meet Nashvillians' needs.

Other departments may have extensive capital assets that change or expand relatively rarely. These departments, such as the Metro Action Commission (Head Start campuses) and Health Department (health clinics) represent relatively stable investments. These department often partner with Metro's General Services Department to develop and implement plans to maintain their facilities or follow their clients as they move throughout the county.

Finally, some departments have relatively rare capital needs, such as a single facility that needs to be maintained or expanded to keep up with proposed or approved staff additions.

Departments develop and submit their capital requests to the Finance Department, which compiles the list of all project requests to the Planning Commission. These requests include information needed by the Planning Department to assess them for alignment with the General Plan. Departments also include a priority designation for each project (see sidebar). Project requests that expand Metro facilities are also

reviewed by General Services and Information Technology Services to be included in their project planning and to ensure that all costs are identified.

COUNCIL PRIORITIES

Councilmembers request projects by October 15 each year. Projects are assessed by the Metro Departments responsible for implementing each request, if funded, as well as the Planning Department. The Planning Department compiles a report identifying how projects align with Department master plans and the General Plan and provides it to Council by December 1. A joint meeting of the Metro Council's Budget & Finance and Planning, Zoning, & Historical Committees meets to develop Council priorities.

Each Councilmember was able to submit 100 points to prioritize projects anywhere in the County. Points were totaled by project and placed in order to assign a priority rank.

All 178 Council-prioritized projects are listed at the beginning of the Metro Council section with page numbers showing where in the CIB they can be found.

Council priorities for each project are shown as below:

<i>Capital group</i>	Mayor's Priority: Transportation
<i>MPC rec priority</i>	B Recommend as planned if funding available
<i>Dept priority</i>	1003: Preferred in FY2023
<i>Council priority</i>	12 of 178

DEPARTMENT PRIORITIES

When submitting their project requests, Metro departments assign each project a priority. Departments with a small number of projects providing the priority in rank order (1 through however many projects they request).

Most departments use the following system for identifying their priority:

Code	Priority
1001	Appropriated and unexpended
1002	Needed in the year shown
1003	Preferred in the year shown
1004	Requested in the year shown
1005	Needed for consideration in future CIBs

PLANNING COMMISSION RECOMMENDATIONS

The Metro Charter requires the Metro Planning Commission provide a recommendation for projects included in each year's Capital Improvements Budget. The Planning Commission develops these recommendations based on three sets of factors, guided by Nashville's General Plan:

- **NashvilleNext Guiding Principles:** To what extent does each project promote the future Nashvillians' want?
- **NashvilleNext Growth & Preservation Concept Map:** To what extent does each project support where Nashvillians want to grow or preserve?
- **Efficient government:** To what extent does each project represent an efficient and effective use of public money?

Each of these sets is broken down into more detailed criteria that use a mix of qualitative and quantitative assessments to score projects.

The Planning Commission also considers other factors in developing recommendations:

- **Return on investment:** For business-like departments, Planning Commission considers projects that enable these departments to become more self-sustaining.
- **Project-specific factors such as legal, contractual, or requirements or existing Metro commitments.**
- **Coordination requirements:** Project dependencies, such as one project that must proceed in order for another high priority project to occur.
- **Population served:** The Planning Commission also considers the per capita cost of the project with similar projects in similar phases. For example, the cost effectiveness to construct two parks would be compared, but not the cost effectiveness to construct one park and plan another, or the cost effectiveness of constructing a park compared to constructing a road.
- **Life-cycle costs and asset management:** Planning Commission may also consider the lifecycle costs of new or significantly expanded assets, as well as the assets (primarily land and buildings) that are made available as services are relocated or coordinated.

Guiding Principles (up to 10 points each)

Be Nashville

Foster strong neighborhoods

Advance education

Create economic prosperity

Champion the environment

Expand accessibility

Ensure opportunity for all

Efficient government criteria

Project need

Condition

Resource leveraging

Project leveraging

Planning context, board/commission support, and engagement in implementation

Regionalism

ENSURE OPPORTUNITY FOR ALL

This guiding principle is scored to identify projects that serve disadvantaged communities in three ways:

- **Targeted services:** Projects that specifically serve a disadvantaged community (10 points).
 - Harris-Hillman School
 - Head Start centers
 - Transit
- **Department plans that include equity as a factor:** Programs that derive from a master plan that included equity measures (5 points).
 - Walk n Bike Master Plan (5 points)
- **Community demographics:** Projects whose service area includes a higher than average concentration of eight demographic groups. The map of combined percentages on the following factors is shown at right.
 - Residents that are:
 - Non-Hispanic minority
 - Hispanic
 - People with disabilities
 - Seniors
 - Households with:
 - Limited English speakers
 - Below poverty
 - No car
 - Single parents

Growth & Preservation Concept Map

- Centers**

 - Tier Three
- Green network**
 - Open space anchor
 - Missing an anchor
- Neighborhood**
- Transition**
- Special impact area**
- High capacity transit corridors**
 - Immediate need
 - Long-term need
 - Regional connection

The Planning Commission uses these factors to assess capital requests. Project requests are then placed into one of the five recommendation tiers:

A Recommend as planned

Projects are **Recommended As Planned** when they substantially advance the Guiding Principles, align with the Growth & Preservation Concept Map, and use Metro resources efficiently. Projects whose funding has already been secured, or that need additional funding to be completed, are also **Recommended As Planned**.

Funding requests for “A” projects reflect the total Department request for FY23.

NOTE: Planning Commission recommends projects not funding levels. In some cases, projects may not need to be fully funded in FY23. (For example, the sidewalk program is recommended, not necessarily the full \$41M sidewalk request.)

B Recommend as planned if funding available

Projects that are in alignment with NashvilleNext. Most projects in FY23 are **Recommended As Planned If Funding Is Available**.

C Recommend further work

The Planning Commission will **Recommend Further Work** when different projects can be usefully aligned with one another to reduce costs or improve service or when projects require additional development before they can be recommended.

N Not scored / Non-General Plan Projects

Projects that are not scored, because they do not relate to the Planning Commission’s role in coordinating development, they are submitted with insufficient information to score, they are low department priorities, are late submissions, or are added after the Planning Commission has acted. Assessing projects that do not relate to the General Plan is likely to make them seem unimportant, when in fact they are simply not addressed by the General Plan. Projects such as these include:

- Information technology
- Fleet & equipment
- Office space retrofits or refreshes
- Omnibus categories of projects
- Contingency funding

X Does not conform to the General Plan

In rare cases, project requests **Do Not Conform To the General Plan**. This recognizes when a proposed capital project is specifically out of step with a recommendation of the General Plan. The Planning Commission will recommend against projects that **Do Not Conform to the General Plan** until the project and plan are in alignment. This can be done by changing the project to conform to the General Plan or by amending the General Plan to support a vision for the future of Nashville that would be supported by the project.

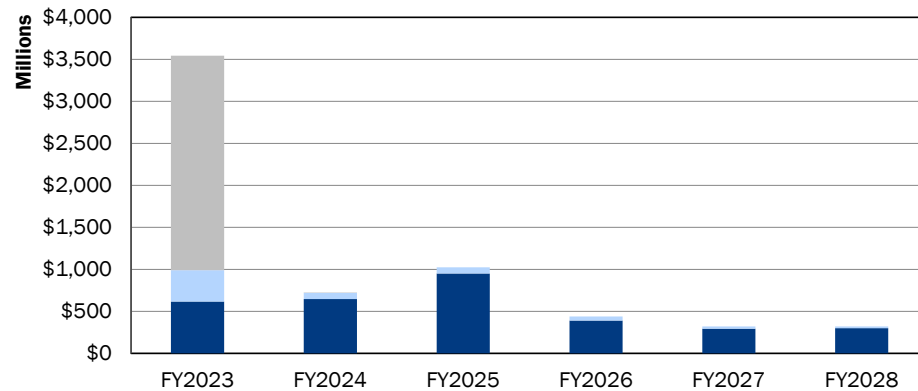

PLANNING COMMISSION RECOMMENDATIONS AND PAST SPENDING

The charts below shows project spending by the Planning Commission’s recommendation. The top chart shows the total value of requests for new General Obligation bond funding, compared with two recent periods of different spending levels. The bottom chart shows the value of projects requesting other funding sources.
