

Bioretention Media Certification List

The following is a list of companies that have received bioretention media certification by Metro Water Services (MWS). Each company on this list has submitted these minimum requirements for approval:

- Bioretention media composition (current) test results meeting the specifications within Volume V of Metro Nashville’s Stormwater Management Manual with testing done in accordance with Bioretention Media Lab Testing Methodology developed by MWS
- A 5 gallon bucket of bioretention media (current).
- A signed copy of the Bioretention Media Certification Application. The form requires detailed information about nursery bioretention media make-up, estimated quantities, mixing process, etc.

Each company on this list is required to meet the following conditions to remain on this list:

- Submittal of test results twice a year that meet specifications (Spring and Fall).
- Can be requested at random by NPDES to submit a bucket of bio media mix for testing.
- Can be subjected to random on-site sampling/testing either at manufacturer facility or any installation site that received a grading permit after approved date of certification.
- Must Notify NPDES contacts when more than 40 cubic yards of bioretention media are ordered to be delivered to one site.
- Are subject and must adhere to Certification Revocation Process outlined in the [MWS Bioretention Media Certification Program](#).

This list is for your convenience only and is not a recommendation or endorsement by the Metropolitan Government of Nashville and Davidson County of the product these companies provide nor is it an exclusive list of companies that offer bioretention media. The companies on this list have provided sufficient documentation that their bioretention media meets MWS’ standards. This allows companies on this list to forgo providing test results of their bioretention media for the as-built process. Sites/developments are not required to use any of these companies on this list. Please be aware that companies not on this list are required to provide test results of their bioretention media for the as-built process.

| Company | Contact | Phone | Email |
|--------------------------------------------|----------------|--------------|-----------------------------|
