

Nashville Community Homelessness & Housing Data, June 2026

Data Source: The Nashville-Davidson County Homeless Management Information System (HMIS). HMIS is a *shared community database* that collects data on households experiencing homelessness and programs intended to end homelessness. HMIS includes data from **48 participating service providers** in Nashville; including emergency shelters, transitional housing, street outreach, supportive services, and permanent housing programs. The Office of Homeless Services is the HMIS Lead Agency responsible for administering the HMIS and associated reporting.

3,108 people experienced homelessness in Nashville in **June 2026**. These 3,108 people were in **2,604 households**; **209 families** (including 402 children) and **2,395 adult only households**. Over the past 12 months, **13,352 unique people** have experienced homelessness in Nashville.

Number experiencing homelessness

Increased Data Collection: As of November 2024, HMIS includes data from the Nashville Rescue Mission. While our system and community adjusts to this improvement in data collection, the data from these programs will be separated from our regularly reported data. As we improve data quality and strengthen the connection between HMIS and the Nashville Rescue Mission, we expect to see these numbers increase.

The data import process with the Nashville Rescue Mission is currently under review. Please bear with us as we dig a little deeper to ensure all data reported is complete and accurate.

Nashville Community Homelessness & Housing Data, June 2026
