Are you prepared for Winter?

¿Estas preparado para el invierno?

before Cold weather Arrives

- Wrap pipes in insulation.
- Shut off and drain your irrigation system.
- Locate your water shut off valve BEFORE you need it.

- *Wrap pipes in insulation.*
- *Shut off and drain your irrigation system.*
- *Locate your water shut off valve BEFORE you need it.*

once freezing temps hit

- Open cabinet doors to allow warm air to circulate.
- Let your faucet trickle to keep water moving.
- If you will be going away during cold weather, leave the heat on in your home.

- *Open cabinet doors to allow warm air to circulate.*
- *Let your faucet trickle to keep water moving.*
- *If you will be going away during cold weather, leave the heat on in your home.*

if Your Pipes Freeze

- Thaw pipes with warm air using a hair dryer or space heater. DO NOT use an open flame.
- Check all other faucets.
- Keep an eye out for leaks in pipes as they begin to thaw.

Are you prepared for Winter?

¿Está preparado para el invierno?

Before Cold Weather Arrives

Antes que llege el frío

- Wrap pipes in insulation.
- Shut off and drain your irrigation system.
- Locate your water shut off valve BEFORE you need it.

- *Envuelva las tuberías con material aislante.*
- *Cierre el suministro de agua y drene su sistema de riego*
- *Localice la válvula de cierre del agua **ANTES** de necesitarla.*

Once freezing temps hit

Cuando pegue la temperatura helada

- Open cabinet doors to allow warm air to circulate.
- Let your faucet trickle to keep water moving.
- If you will be going away during cold weather, leave the heat on in your home.

- Abra las puertas de los gabinetes para que circule el aire caliente
- Deje que salga un poco de agua del grifo para mantener el agua en movimiento.
- Si va a estar fuera de casa, deje encendida la calefacción.

If Your Pipes Freeze

Si sus tuberiás se congelaron

- Thaw pipes with warm air using a hair dryer or space heater. DO NOT use an open flame.
- Check all other faucets.
- Keep an eye out for leaks in pipes as they begin to thaw.

- Descongele las tuberiás con aire caliente usando una secadora de cabello o un calentador portátil. **NO USE UNA LLAMA ABIERTA.**
- Revise todos los demás grifos.
- Esté atento a posibles fugas cuando las tuberias comiencen a descongelarse.
