|----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Casting Adjustments</b>                   | Adjust: lowering utilities to allow milling machines to traverse the roadway without damaging utility assets.<br>Re-adjustment: raising of utilities so that they will be flush with the new surface that will be applied.                                                                         |
| <b>Milling/Undercutting or Base Failures</b> | Removal (milling) of old surface using a milling machine. All milled surfaces must be cleaned by the milling contractor and marked appropriately to safely direct traffic. During undercutting the old surface that has failed is cut out and new material is put back in before it is resurfaced. |
| <b>Infrared</b>                              | A technique where infrared heating systems apply heat to pavement surfaces and aid in the removal of existing material and replacement with new asphalt mixture.                                                                                                                                   |
| <b>Signal Loop Wires</b>                     | Signal Loop Wires are installed under the pavement. They are used to detect vehicles passing or arriving at a traffic light.                                                                                                                                                                       |
| <b>Crack Seal</b>                            | A sealant put into the construction joint to keep water out so the road will not depreciate.                                                                                                                                                                                                       |
| <b>Fog Seal</b>                              | A sealing put on the road to give the road an extended period before it gets paved.                                                                                                                                                                                                                |
