

Capital Investments:

TURNING PLANS INTO **PROGRESS**

CHOOSE
HOW YOU
MOVE

CHYM Investment Priorities

This \$100 million investment allows Choose How You Move to keep building current projects and start new ones across all four voter-approved priorities: sidewalks, signals, service, and safety. It also means more improvements will move from planning into construction.

Sidewalks

\$16.8M

Moving 17 new quick-build sidewalk projects across 15 council districts into planning and design to close gaps in the pedestrian network, connect residents to major transit routes, and provide safe, easy connections accessible to all users.

Transit Service

\$29.8M

Transit Centers **\$25.3M**

Planning and building transit centers, including construction of the Donelson Transit Center and site selection and project development for future locations, to expand connectivity, improve reliability, and support future service growth.

Bus Operations and Maintenance **\$3.7M**

Installation of new maintenance bays and lift, bus wash, and lighting and electrical upgrades at existing WeGo facilities, including the Nestor Street operations and maintenance facility, to improve bus operations.

Bus Fleet Expansion **\$750K**

Expansion and modernization of WeGo's bus fleet to support continued CHYM service improvements. This investment includes the purchase of 3 new vehicles to better meet the needs of WeGo Access riders.

Safety

\$22.4M

Complete Streets

Planning, design, and construction of Complete Streets to improve safety and connectivity for all users. Investments include full construction of the Edgehill Avenue, design of four additional Complete Streets projects across 8 miles (East Thompson Lane, County Hospital Road, Jefferson Street, and Lebanon Pike), and engineering and survey work initiated on nearly 34 miles of future Complete Street projects.

Signals

\$19M

Corridor Upgrades **\$7.9M**

Installation of 99 new smart traffic signals across Gallatin Pike (56), Wedgewood Avenue (6), Edgehill Avenue (5), and Hillsboro Pike (32) to improve safety, reduce delays, and support reliable travel.

Advanced Traffic Management System (ATMS) **\$2M**

A centralized ATMS using real-time data, connected signals, cameras, and dynamic messaging to improve traffic operations, incident response, and signal timing, including bike and pedestrian recognition and transit signal priority. Activating along Nolensville Pike, Harding Place, Downtown, Murfreesboro Pike, and Lebanon Pike.

Fiber Communications Network **\$4.5M**

Future fiber optic cable will connect signals in real time and enable future smart mobility technology. New network hardware is now live at 73 CHYM intersections, over 12% of the program's total.

Signal Network **\$3.0M**

Long-lead hardware procurement to accelerate future signal construction and modernization citywide.

All-Access Corridors

\$7.7M

Planning, engineering, and project development for Nashville's busiest roadways, creating walkable communities, connected to high-quality transit.

Funding advances the Nolensville Pike AAC through planning, engineering, and community engagement, and continues corridor design for the Gallatin Pike AAC. It also launches a Transit-Oriented Development Study, a program-wide framework for how Nashville grows around high-quality transit.

SIDEWALKS

30th Avenue North Pre-Construction

From Clare Avenue to Batavia Street.

Clover Street Pre-Construction

From 33rd Avenue North to 32nd Avenue North.

19th Avenue North Pre-Construction

From Herman Street to Warner Street.

Clifton Avenue Pre-Construction

From 25th Avenue North to Felicia Street

SIGNALS

Advancing Traffic Signal Operations

Through Advanced Traffic Management System software, CHYM will be transitioning all signals to a new system to provide better connectivity and visibility of operations, allow for more timely maintenance and troubleshooting, and upgrade the security of the signal equipment that is currently in place.

Fiber Update

New network hardware at 73 intersections across Nashville to power countywide traffic signal network upgrades.

SERVICE

WeGo Service Upgrades

- **Route 19** – Herman: expanded Sunday service hours starting at 5:15 a.m.
- **Route 50** – Charlotte Pike: expanded Sunday service hours from 5:15 a.m. to 1:15 a.m.
- **Route 22** – Bordeaux: expanded Sunday service hours from 5:15 a.m. to 1:15 a.m.

Service Expansion

More frequent service on high-ridership routes, expanded evening and weekend hours, improved airport transit, new WeGo Link connections, Journey Pass fare-free access program and buses needed to build a more reliable, 24/7 transit network for Nashville.

WeGo Service Changes

Creswell Middle Magnet School trips now operate on **Route 77**; morning service is unchanged.

SAFETY

Church Street and Elliston Place Complete Street

Transforming Church Street and Elliston Place from West End Avenue to Rosa Parks Boulevard through planning and design with upgrades that make it safer and more comfortable for everyone, regardless of how they travel. Improvements include bike facilities, pedestrian enhancements and corridor-wide safety improvements.

Jefferson Street Complete Street Design

This project on Historic Jefferson Street between Ed Temple Boulevard/28th Avenue North and Rosa Parks Boulevard is advancing through design to create a safer, more connected corridor for people walking, biking, riding transit, and driving. Planned improvements will support safer travel, improve accessibility, and strengthen connections between neighborhoods, businesses, and community destinations along this important corridor.
